Mahr Metering Acquires Unipre

[Leave a reply](#)

Mahr Metering Systems GmbH, an international company whose portfolio includes gear pumps and mixing and dispensing machines, has acquired Unipre GmbH, based in Werl (North Rhine-Westphalia/Germany).

Dr. Reiner Karl and Theo Hunold.

Since 1974, Unipre has been established on the market as an innovative quality supplier of dispensing and mixing systems for processing liquid plastics, specialized in the construction of tailor-made machines and systems.

The company in Werl will be managed under the name Mahr Unipre GmbH. The location in Werl is thus preserved and the merger creates new jobs.

In the future, Mahr Metering Systems in Göttingen will concentrate on the growing business with gear metering pumps. At the new location in Werl, the machine business of Mahr Metering Systems and Unipre will be merged and expanded.
